**More Innovative Ideas From Diamond Logix<sup>®</sup>**  
**Diamond<sup>®</sup> Cabinets Expands Logix<sup>®</sup> Product Line With**  
**More Organization Options, More Design Flexibility, More Everyday Solutions**

CHICAGO (April 15, 2010) — Innovative organization ideas just keep coming from Diamond Logix<sup>®</sup>. With the addition of seven new cabinetry products, Diamond Cabinets builds on the success of its designer-friendly Logix line with more organization options, more design flexibility and more everyday cabinetry solutions for the kitchen, bath and rooms throughout the home.

“This year we’ve added next generation solutions to our Diamond Logix line, breathed new life into some of our most popular organization solutions and incorporated even more fresh ideas into our cabinetry. All of the new products can help designers create spaces that allow homeowners to better organize their homes – and their lives,” said Cathy Hitz, brand manager for Diamond Cabinets.

**More organization options**

Diamond Logix builds on its successful drop-zone concept with two new utility cabinets that provide reserved parking spaces for all the extra “stuff “ that life throws at us: car keys, cell phones, backpacks and such. The **Utility Drop Zone Cabinet**, at 24-inches deep and in heights ranging from 84 to 96 inches, organizes the things homeowners don’t want loitering on countertops. Four shelves provide storage for various what-have-yous, while a pull-out charging station takes care of small electronic devices. A back-of-door magnetic whiteboard and pencil holder offers a place to jot down messages and help everyone keep track of who’s going where.

Meanwhile the new 9-inch deep **Utility Organizer Drop-Zone Cabinet** offers a similar version, which is designed to be used at the end of a cabinet run. It features a charging station, key hooks and coat hooks, plus open space to accommodate anything from a tote bag to a light jacket to dog leashes, plus enough floor space to stash a bag of pet food and treats.

### **More design flexibility**

Diamond makes modular systems more flexible than ever with the new **EasyTrax™ Cabinet**, a new sliding shelving system that allows users to rotate up to five trays along a heavy-duty ladder system —without the hassle of pulling out a toolbox. The cabinet has five quickly movable, easily manageable sliding trays that can be quickly changed into one-, two-, three-, four- or even five-shelf combinations at varying heights, making it possible to tuck away anything from tall blenders and bulk-sized soda bottles to small food cans and packages. Every shelving combination offers easy accessibility, increased visibility and incredibly flexible capacity. The EasyTrax is available in standard height base, full-height base, or utility cabinet configurations and the SoftClose anti-slamming mechanism comes standard.

### **More everyday solutions**

Leave it to Diamond to transform take-it-for-granted staples of kitchen functionality into modern storage must-haves. The **2-Drawer Wall Unit With Tiered Drawer Inserts** offers the perfect solution for storing small items such as spice jars or medications. It is also available as a combination cabinet with a name that says it all: the **Wall Cabinet with 2 Drawer Unit Below and Tiered Drawer Inserts**.

Another everyday storage wonder is the **Wall Spice Pullout**. At just 9 or 12 inches wide, its five shelves with side racks are perfect for small-to-tall jars and bottles. And for a really out-of-sight solution, Diamond adds the **Base Recycling Unit**, which holds and hides four 27-quart removable bins for recyclable papers, jars, glass and plastic items. This addition complements Diamond's existing Corner Recycling Unit to meet the growing trend toward consumers living greener lifestyles.

### **About Diamond Cabinets**

Diamond Cabinets is a division of MasterBrand Cabinets Inc., the second-largest cabinet manufacturer in North America. Diamond Cabinets holds certifications from the Kitchen Cabinet Manufacturers Association's Environmental Stewardship Program and the Arthritis Foundation's Ease-of-Use program.
